Rancagua, Chile

in Diego Godoy

Izzyll

Summary

Computer Science Engineer with 5 years of experience developing frontend and mobile applications using React, React Native, Next.js, Vite, TypeScript, and Node.js. Experienced in delivering projects for banking, healthcare, and retail, building scalable user interfaces, optimizing application performance, and integrating modern API-driven architectures following SOLID principles. Skilled in collaborating with UX/UI teams, implementing design systems, and deploying applications on AWS/GCP within Agile environments.

Experience

Frontend Engineer – Femsa - Cruz Verde – Nov 2024 - Jul 2026 – Remote

- Played a key role in migrating Cruz Verde Chile's native mobile application to the React Native Expo ecosystem.
- Developed and implemented frontend features focused on performance, navigation, and user experience.
- Implemented push notifications, deep links, and performance optimizations through refactoring and best practices.

Frontend Engineer – MetLife – Apr 2024 - Aug 2024 – Remote

- Developed frontend features using React Native and TypeScript.
- Implemented native modules in Kotlin and Swift for platform-specific integrations.
- Worked with Redux, Redux Saga, Firebase, Context API, and Custom Hooks for state management and application architecture.

Frontend Engineer – Banco BICE – Apr 2023 - Mar 2024 – Remote

- Developed features focused on improving users' digital banking experience and financial operations.
- Built frontend architecture using React Native, Redux, RTK Query, and Context API.
- Integrated analytics, Remote Config, and workflow optimizations into the development process.

Fullstack Developer – Enara Health Weight Loss Startup – May 2022 - Mar 2023 – Remote

- Developed a nutrition application using React Native and TypeScript.
- Built microservices with Node.js, Express, and MongoDB.
- Integrated APIs, managed application state with Redux, and published apps to the App Store and Google Play.

Frontend Developer – Agilesoft – Dec 2021 - May 2022 – Remote

- Developed frontend features for Banco de Chile's Mi Seguro application using React Native.
- Built reusable interfaces using Redux, Context API, and Custom Hooks.
- Collaborated with UX/UI teams to implement design systems.

Frontend & Fullstack Developer – DynamicLab – Jun 2020 - Dec 2021 – Remote

- Developed web applications using React, Next.js, and TypeScript.
- Built reusable interfaces, responsive layouts, and REST API integrations.
- Configured and developed projects using Vite to improve performance and build times.
- Developed backend services with Node.js and microservices.
- Worked with MongoDB, PostgreSQL, and cloud deployments on AWS.

Education

Bachelor's Degree in Computer Science Engineering – Universidad Tecnológica de Chile INACAP – 2017 – 2020 – Rancagua

Technical Skills

Frontend: React, Next.js, Vite, React Native, Expo, TypeScript, Redux, RTK Query, Context API
Backend: Node.js, NestJS, Express, REST APIs
Cloud & Tools: AWS, GCP, Firebase, Git, CI/CD, Figma
Databases: MongoDB, PostgreSQL
Other: Clean Architecture, SOLID Principles, Agile Methodologies
